URANIUM SQ loudspeakers awarded by EISA „Best Product In-Car Speaker Series 2020-2021“

The German Car&HiFi magazine has published the EISA award winners and phrased as follows*:

The loudspeaker packages and individual component options in Ground Zero's successful entry high-end Uranium SQ range are an excellent choice for those seeking to build a high-quality in-car system. Depending on specific needs, enthusiasts can choose from passive and active two-way and three-way configurations all based around a 165 mm aluminium cone midwoofer and 28 mm dome tweeter or cherry-pick from Ground Zero's series of separates – which includes 55 mm silk dome midrange, 60 mm full-range and 80 mm midrange units – to assemble a bespoke solution. Capable of an audio performance with excellent resolution and tonality, plus authoritative bass, the Uranium SQ line-up lets you design the perfect system for your car. <https://eisa.eu/awards/ground-zero-uranium-sq/>
